SKILLS

- Proficient in UiPath Studio Orchestrator and Robot
- Limited Proficiency: HTML, C#, VB.Net
- MS- Office
- Automation Skills : Excel Automation
PDF Automation, Email Automation
Web Automation, Image/OCR Automation
API Integration.
- Automation Tool : UiPath (RPA)
- Excellent problem-solving and analytical skills
- Effective communication and collaboration abilities.

PROFESSIONAL SUMMARY

Results-driven professional with a proven track record of success, combining 3.3 years of experience in BPO operations and 2.5 years in RPA(UiPath). Proficient in analysing business processes, identifying automation opportunities, and delivering scalable and efficient automation solutions. Skilled in RPA best practices and committed to achieving client success and satisfaction every step of the way.

EMPLOYMENT HISTORY

ROLE: RPA DEVELOPER ,TATA CONSULTANCY SERVICES
(NOVEMBER, 2021- PRESENT)

- Understanding the business requirements and providing efficient and reliable solutions
- Configuring automation process and create Solution Design Document as per Process Definition Document.
- Documented automation processes, including process maps, technical specifications, and user manuals
- Over 90% achievement of on-time deliverables with proper test logs and reports.
- Designed, developed, and deployed automation workflows using UiPath Studio to automate repetitive tasks and streamline business processes.
- Analysed business processes to identify automation opportunities, conducted feasibility studies, and developed automation strategies.
- Collaborated with stakeholders to gather requirements, define automation objectives, and ensure alignment with business goals.
- Implemented best practices for error handling, exception management, and logging to ensure the reliability and maintainability of automation solutions.
- Integrated automation workflows with external systems, and APIs to facilitate end-to-end automation processes.
- Managed and monitored automation processes using UiPath Orchestrator, scheduled jobs, and maintained robot configurations.
- Provided training and support to team members on RPA concepts, tools, and best practices.
- Good understanding in scrapping, OCR engines, Recordings, Selectors.

ROLE: PROCESS ASSOCIATE,TATA CONSULTANCY SERVICES
(AUGUST,2018- NOVEMBER,2021)

- Quickly resolved customer queries and complaints improving service reliability and efficiency. Preparing Weekly and Monthly client deliverables, iQMS deliverables.
- Part of an automation using tool RPA Blue Prism supported in PDD, closely monitored it and tested the output report for quality purposes.
- Worked in Mainframe Application, facilitating process workflow modelling in order to collaborate on process improvements, automation capabilities and clearly defined end to end users.

EDUCATION

- B.Sc. (Mathematics)
2015-2018 Bharathidasan University.

CERTIFICATION

- Certified in UiPath-RPA
- RPA UiPath Developer Foundation
- RPA UiPath Developer Advanced

PROJECT #1: AIRLINE (CORPORATE SERVICES)

PROJECT TITLE: SharePoint File Retrieval and Excel Data Extraction Automation

DESCRIPTION:
Implemented an end-to-end robotic process automation (RPA) solution to automate the retrieval of files from SharePoint, extract specific data from input Excel files, and update another Excel file with the extracted data. The automation significantly reduced manual effort and improved data accuracy in the data processing workflow

PROJECT #2: AIRLINE (CORPORATE SERVICES)

PROJECT TITLE: Outlook File Extraction and Excel Data Modification Automation

DESCRIPTION:
Implemented a comprehensive robotic process automation (RPA) solution to automate the extraction of files from Outlook email attachments and update an Excel file with various modifications, including cell formatting, data aggregation, and the application of advanced Excel formulas such as XLOOKUP. The automation streamlined data processing tasks, reduced manual effort, and enhanced data accuracy in Excel reports.

PROJECT #3: AIRLINE (CORPORATE SERVICES)

PROJECT TITLE: PDF Data Extraction and Excel Update Automation with SharePoint Integration

DESCRIPTION:
Implemented a RPA solution to automate the extraction of data from a single PDF document, validate totals against predefined criteria, update an Excel file with the extracted data and validated totals, and upload the updated Excel file to SharePoint for centralized storage and access. The automation streamlined data processing tasks, reduced manual effort, and improved data accuracy and accessibility.

PROJECT #4: AIRLINE (CORPORATE SERVICES)

PROJECT TITLE: Data Update Automation with Ariba and PeopleSoft Integration

DESCRIPTION:
Implemented a RPA solution to automate the updating of data into two enterprise applications, Ariba and PeopleSoft, while validating the data against predefined criteria stored in Excel and incorporating API calls for seamless integration. The automation streamlined data management processes, enhanced data accuracy, and improved operational efficiency across multiple systems.
