- Skilled professional having around **2+** Years of IT Experience including **1.6** years of RPA process implementation using **UiPath** and **0.6** years of experience in **Support Engineer**.
- Experience in Designing, Developing, Testing and deployment of Bot's using tool **UiPath**.
- Hands on Experience in creating **PDD** (Process Definition Document) and developed respective **SDD** (Solution Design Documents).
- Experienced in Robotic Process Automation Tool UiPath to automate web applications, desktop applications, and performed **excel manipulations and validations**.
- Expertise in implementing an automation of various processes like extracting data from CSV, Excel files, invoice processing, order processing, service desk automation etc. with the help of UiPath.
- Worked with the Business Analysts in identifying and defining the requirements.
- Highly **result oriented and pro-active**, proven abilities to learn new technologies quickly and implementing them successfully in production.
- Strong analytical, problem solving & programming skills, cohesive team worker with exceptional Planning & execution skills.
- Demonstrated ability to work under tough deadlines/pressure.

HIGHEST EDUCATION:

- B.E (Mechanical Engineering) | 2022 | Panimalar Institute of Technology.

TECHNICAL SKILLS:

- RPA Tool : UiPath
- Automation skills : Excel Automation, Web Automation, E-mail Automation, Api Automation, Document Understanding
- Operating System : Windows

PROFESSIONAL EXPERIENCE:

- ✓ Working as **RPA developer** in **Sutherland, Chennai** from Dec 2021 to till date

Project Name	E TRADE Morgan Stanley
Tools and Technology used	UiPath
Duration	1 Years
Role	UiPath Developer

DESCRIPTION:

E*TRADE is the pioneer of online trading for retail investors and now part of Morgan Stanley, a leading global financial services firm renowned for the quality of its wealth management, investment advisory services, research, and market insights.

RESPONSIBILITIES:

- Used **UiPath automation** elements such as **Mouse, Keyboard** and **Attribute** to automate the **desktopsequence activities**.
- Developed **ROBOTS** using **UiPath** to automate and **accelerate** 70% of standard business process with minimum human intervention for remaining non-standard processes.
- Implemented **selectors** for interacting with **window** and **web browsers** for continuous navigation of applications.
- Used **Screen Scraping** method to **extract text** from **running window** application by appropriate output methods.
- Used **Data Scraping** method for **extracting structured** data from **browser applications** or documents into a **CSV file** or Excel Spread sheet.
- Used **Excel automation** for repetitive **Excel data entry**, appending and for comparing columns.
- Used **UiPath Orchestrator** for deployment, monitoring and management of UiPath Robot automation activity.
- Handled **exceptions** using **Try-Catch** activity.
- Handled the **Execution** of project in **UiPath Robot**.
- **Deployed** the process in **UiPath Orchestrator** and **scheduled** their execution.
- Maintained several **RPA Bots** as batch processes on daily basis and ensure quality and high performance to the internal and vendor applications of the organization.
- Created process model for windows-based application using **UiPath** and testing it in the inbuilt controller provided by **UiPath Studio**.
- Extensively worked on debugging application for fixing bugs and Production support.
- Involved in code review and fine tuning the code for performance related issues.

Project Name	UnitedHealth Group
Tools and Technology used	UiPath
Duration	0.6 Years
Role	UiPath Developer

DESCRIPTION:

UnitedHealth Group is a health insurance company that also provides data analytics and consulting services to healthcare providers, as well as pharmacy care services. Its principal divisions include UnitedHealthcare, OptumHealth, OptumInsight, and OptumRx.

RESPONSIBILITIES:

- Designed and developed automated solutions based on client requirements using UiPath RE- Framework with standard RPA design principles.
- Conducting unit testing and System testing.
- Facilitating Integration and User Acceptance Testing.
- Managing and investigating exceptions. (Business and System Exceptions).
- Supporting existing processes like error fixing and implementing change requirements as a part of structured change control process.
- Fixing bot issues / incident fixes on time and providing workaround to business to run the bot within runtime SLA.
- Problem solving issues that arise in day to day running of automation processes and providing timely responses and solutions as required
- Deployment of code through Orchestrator.
