SYNOPSIS

To work in a stimulating and challenging environment that would facilitate the maximum utilisation and application of my broad skills and expertise in making a positive difference to the organisation

Professional Summary

- I have completed my “Automation Anywhere Certified Advanced RPA Professional (Automation 360) Certification”.
- Possess 2.6 years of total professional experience in automating web, windows and excel based applications using Automation Anywhere.
- Deployed end to end projects including requirement gathering, feasibility analysis, creating design documents (ADD, SDD, User manual), coding, testing, deployment and maintenance.
- Handling projects efficiently for delivering the required applications in a very systematic way.
- Understanding the technical and functional specifications.
- Awarded for the good effort as a team member in completion of the Automation project.
- Supporting the Operational Teams during the UAT and rollout phases.
- Good Experience in Agile Methodology.
- Gained exposure to different phases of Software Development Life Cycle.
- Conducted the business demo to showcase products and features developed.

Current Employer- Tata Consultancy services

Role: Systems Engineer (November 2021- Present)

1)Project- Humana

Humana is a private insurance company in the USA which contracts with Medicare to offer benefits to plan members.

Project Details:

Currently I am engaged in recreating the BOTs using Automation Anywhere A360 from scratch which were developed using Work Fusion. As part of this project, I am developing Bot which helps in generating the Insurance plan by checking the history of the Insurer.

Technology: Automation Anywhere A360, Microsoft Excel, MSSQL, Visio

Roles and Responsibilities:

- Creating Bots using the tool to automate the manual processes in place.
- Coding, unit testing of enhancements & bug fixes required for the bot.
- Understand requirement for change in process of organisation
- Prepare business requirement documents, design etc.
- Prepare test cases and get involved in UAT.
- Had interactions with the Operations Team on a regular basis to discuss the requirements.
- Assisting in deployments and UAT Support.
- Coding as per the requirements by adhering to the standards.

2)Project- JLR

Jaguar Land Rover Limited is a British multinational automobile manufacturer which produces luxury vehicles and sport utility vehicles. Jaguar Land Rover is a subsidiary of Tata Motors.

Project Details:

The scope of this project is to download files from different web applications based on the input given by the client. Data is extracted from those files using IQ bot and excel commands and are updated in the GCP table for end user consumption. The bot runs on a schedule.

Technology: Automation Anywhere A360, Microsoft Excel, MSSQL, IQBOT

Roles and Responsibilities:

- Creating Bots using the tool to automate the manual processes in place.
- Coding, unit testing of enhancements & bug fixes required to the Portal.
- Understand requirement for change in process of organisation
- Prepare business requirement documents, design etc.
- Prepare test cases and get involved in UAT.
- Had interactions with the Operations Team on a regular basis to discuss the requirements.
