

THULUPUDI SARATH KUMAR

RPA Developer | UiPath diploma Advanced Certified

Phone : +919032914625

e-mail : sarath15bf@gmail.com

To be a part of the challenging team which strives for the better growth of the organization and which explores my potentiality and provides me the opportunity to enhance my talent with **UiPath Development** an intention to be an asset to the company

PROFILE SUMMARY

- Having overall 4+ years of experience in IT industry experience reaming Highly skilled UiPath Developer with 3+ years of experience in developing and implementing automation solutions using UiPath RPA platform
- Proficient in designing and optimizing workflows, creating automation scripts, and integrating systems to streamline business processes.
- Strong problem-solving abilities and a proven track record of delivering efficient and reliable automation solutions. Excellent communication and collaboration skills, with the ability to work effectively in cross-functional teams.
- Professional Certified RPA developer holding over all 2+ yrs. of experience, which includes 2+ years of complete hands-on in full RPA life cycle
- Proven interpersonal, communication and presentation skills.
- Designed, developed and provided enhancements for the automations by implementing APIs for the better efficiency.
- Handled exceptions using Try-Catch activity.
- Having knowledge about document understanding.
- Deployed the process in UiPath Orchestrator and scheduled their execution.
- Used Queues to collect information from orchestrator to perform additional tasks.
- Configured the Bots and deploying processes and scheduled the jobs in UiPath Orchestrator

KEY SKILLS

~UiPath(RPA Tool)

~Stakeholder Management

~Root Cause Analysis

~ JIRA

~Agile Methodologies

~Project Management

~ Process Analysis and Automation

~ Orchestrator

~ Strong Analytical and Problem-solving

EDUCATION

- B.Tech from SRI VENKATESWARA COLLEGE OF ENGINEERING in APRIL 2019, TIRUPATI, ANDHRA PRADESH.

TECHNICAL SKILLS

- Operating Systems: Windows 10
- Skills : Dot Net, C#, JIRA, Agile, Vb script#, Macro Document understanding
- Database: SQL
- RPA Tools: UiPath

ORGANIZATION EXPERIENCE

Working as RPA UiPath developer in **Capgemini** from Jan 2020 to Mar 2024

Role: RPA Developer (UiPath)

Highlights:

- Received "**Certificate of excellence**" By Verizon Client.
- Excellence in Work Award by Capgemini.

Certifications:

- UiPath advanced developer Certified.

PROJECTS

Project:-1

- **Processing the Tickets Generated: -**

The process is to process the tickets / request that are created by the customer sheets. Bot has to process each ticket and update the comments accordingly.

- **Duplicate Ticket Processing: -**

This process is when a new customer request for the new connection the request gets duplicated at times and also the reps were validating the duplicates and then processing the request of addition of lines. Provided the automation solution to validate the duplicates and approve their requested lines based on the eligibility criteria.

Project:-2

Flipkart billing process: -

The Bot interacting with data base and get the status , tracking details and stored into the excel file, then Bot interacting with the one tracking id desktop application and download the attachment and start doing the validation track item, item order, AWS tracking id, transaction date, if everything has been matches Bot will interacting with the one logistic portal and update with this data in relevant fields and generated the delivery date and this date updated into the status file and send it to the endures, whatever data is not matches we updated this data into the data base they will do further manual process.

Project:-3

Cardinal Health Inc (CAH): -

Bot will read the master input file based on user wise Bot will interact with Cardinal Health care and Portal and fetch the user's name and password after login successfully. Bot will consolidate the data and download the file based on month wise once download the all files and uploaded into FTP Application and generate the status file and send to stakeholder.

Roles and Responsibilities: -

- Understanding and analysing business processes to identify automation opportunities and determine the feasibility of implementing them using UiPath.
- Develop and implement automation solutions using UiPath platform, adhering to best practices and coding standards. Analyse business processes, identify automation opportunities, and design efficient workflows.
- Design and optimize workflows to maximize automation efficiency and minimize manual intervention. Ensure scalability and maintainability of automation solutions by following modular design principles.
- Create automation scripts using UiPath Studio, utilizing various activities and components to interact with applications, manipulate data, and perform repetitive tasks. Debug and troubleshoot automation scripts to ensure accurate and reliable execution.
- Integrate UiPath robots with different systems and applications using APIs, web services, and other integration methods. Implement data exchange mechanisms to transfer information between systems and automate data entry tasks.
- Conduct thorough testing of automation workflows and scripts to validate their functionality and identify any bugs or errors. Collaborate with stakeholders to gather feedback and implement necessary changes to ensure high-quality automation solutions.
- Create detailed documentation of automation processes, including workflow diagrams, technical specifications, and user manuals. Generate reports and metrics to track automation performance, identify Bottlenecks, and propose improvements.
- Conducting thorough testing of automation workflows to ensure their accuracy, efficiency, and reliability. Identifying and resolving any issues or bugs encountered during development and testing phases.
- Collaborate with business analysts, subject matter experts, and other stakeholders to gather requirements and understand business processes. Provide technical support and troubleshooting assistance to resolve issues related to automation solutions.
- Stay up-to-date with the latest UiPath features and enhancements. Identify opportunities for process optimization and automation innovation. Proactively suggest improvements to existing automation solutions and actively participate in process improvement initiatives.
- Deploying automation workflows to production environments and monitoring their performance. Managing and maintaining the Bots, ensuring they run smoothly and resolving any issues or errors that may arise.
- Providing support and troubleshooting assistance to end-users and resolving any issues or errors encountered with UiPath automation workflows.
- Process Analysis and Automation Strategy: Analyze existing business processes, identify automation opportunities, and propose automation strategies. Evaluate potential ROI and benefits of automation projects. Develop roadmaps and prioritize automation initiatives.
- Deploy automation processes to UiPath Orchestrator, ensuring proper version control and organization. Monitor and manage process schedules, ensuring timely execution and adherence to defined business rules and priorities.
- Monitor the health and performance of UiPath Orchestrator, including robot status, queue management, and resource utilization. Proactively identify and resolve issues, such as system errors, job failures, or performance.
- Manage robot configurations and environments within UiPath Orchestrator. Assign robots to

specific processes and environments based on workload and business requirements. Monitor robot performance and availability.

- Configure and manage queues and assets within UiPath Orchestrator. Define queue priorities, manage queue items, and ensure efficient handling of work items. Maintain asset integrity and security.

DECLARATION

Managed and communicated effectively with hereby I assure that all the above information is true to my knowledge, and when given up opportunity, I will render my best co-operation for attaining the goal of the organization.

(SARATH KUMAR)
