Dear Toolfe,

I am writing to express my interest in the Software Tester intern position at Toolfe, as advertised on Naukri. With a recent Bachelor of Computer Application degree from The American College and a three-month internship in software testing, I am excited to contribute to your team.

During my internship at TCARE (P) LTD, I gained hands-on experience in manual and automated testing. I was responsible for designing test cases, executing test scripts, and documenting defects. I became proficient in using testing tools such as Cypress Automation Tool, Postman API Tool, JavaScript programming language, and manual testing. One of my key achievements was identifying a critical bug that could have led to significant downtime, which I communicated effectively to the development team, resulting in a timely fix.

My academic background in BCA has given me a solid foundation in software development and testing principles. I have also worked on various projects where I applied my skills, such as the Restful Booker API project and an e-commerce selenium books project, further preparing me for a role in software testing.

I am eager to bring my skills and passion for quality assurance to your team. I have attached my resume for your review and would welcome the opportunity to discuss how my background, skills, and certifications align with the needs of your team.

Thank you for considering my application. I look forward to the possibility of contributing to Toolfe.

Sincerely,  
Mohamed Yasar

# M. MOHAMED YASAR
