PROJECT:

Application Name : OpenCart

Application: Web application

Domain : E-Commerce

Description: OpenCart is a web based E-commerce application, I undertook a mini project, which involved manual testing, and open Cart consists of several modules, including Register, login, and logout etc..

ROLES AND RESPONSIBILITIES:

- Worked specifically on the "Register" module within the platform.
- Created a comprehensive requirement document for the "Register" module, outlining the specific functionalities and features to be tested.
- Developed test scenarios to cover various use cases and ensure thorough testing of the "Register" module.
- Wrote detailed test cases to validate the functionality, usability, and performance of the "Register" module. Executed the test cases manually.
