PROJECTS

Vionsys It Solutions India Pvt. Ltd Company Website

- Developed a company website
- Technologies Used: React .Js ,Tailwind CSS, Node .Js
- Company Website Link: <https://www.vionsys.com>

Supermarket Billing System Using C++

- In this project, there are various functions that we will be creating for this project, like add function to add the goods and products in the market and delete function to delete some products, etc. Also, we will create a buyer side where the buyer can buy the products or food items of his choice in a very detailed manner.

Employee Management System Using React .Js and Node .JS

- In this project we have developed a employee management system using which we can keep record of our employees. It has two logins one is employee login and other is admin login.
- Admin as well as employee can see his/her login and logout time , total working time.
- In this system we also created a section leave management section where use can send a leave request , can see how many his/her leave are remained, also can see his/her leave is approved by admin or not , can cancel the leave if does not required , admin has also see the all information of employee and take action on employee leave requests.
