## **RPA Developer**

## **UiPath**

### **Professional Summary**

- Immediate Joiner With overall 2.3 years of Experience in Robotic Processes Automation (UiPath).
- Challenging career in Robotic Process Automation (RPA) technology in UiPath tool for the role which demands the best of my professional ability in technical and analytical skills and helps me in broadening and enhancing my current skills and knowledge.
- Designing, Developing, Testing and deployment of Bot's in Orchestrator.
- Debugging and Exception Handling.
- PDF automation, SAP Automation, Email Automation, Orchestrator components.
- Good knowledge of RE framework.
- Data scraping from web using web scraping.
- I have automated manual QC processes which include entering the results in Smart ilab and approving automatically, based on specification and it processes payment, depends on quality and quantity of material.
- Automate mail activities like sending mail form smart ilab.
- Having a knowledge in creating Root Cause Analysis (RCA) for the BOT's which got terminated.
- I have automated multiple internal projects as a citizen developer using UiPath RPA.
- I have good knowledge on Document Understanding.
- Here I have mentioned some of Projects which I have automated End to End.

#### **Project name: Excel automation**

- Read the data from input excel.
- Update the excel data into web portal.
- Update the status in excel.

#### **Project name: PDF AUTOMATION**

- Extracted the data from PDF Files.
- Enter the extracted data into portal.
- Upload the files to portal
- Send results over email.

#### **Project name: SAP Automation**

- Get the vendors details from sap.
- Check the details if vendor have any due.
- Automated to send the mails to vendors with all related attachments from SAP. And update all the details in database using SQL Queries.

#### **Project name: Account Payable Process**

- Download the invoice from the mail
- Send the invoices to Abbyy hot folder
- Get the extracted data from Abbyy in the excel format.
- Process the excel invoice data to SAP.
- Validate all the details and post or park the invoice.

### **Roles and Responsibilities**

- Understand the requirement as per the Processes Design Document (PDD)
- Design and develop the processes as per the PDD using UiPath RPA.
- For the development processes creating SDD.
- Complete the UAT processes and crate the document for test case.
- Processes deployed to production and run in hyper care mode.

### **Work Experience**

- Worked as a RPA Developer in ATOS Syntel PVT LTD(Eviden) from 2022 to till date.
- Worked in T-EDGE Solutions Pvt Ltd from 2021 - 2022.

### **Technical Skills**

- Excel automation PDF automation, Email Automation, Orchestrator components, RE framework.
- Robotic Process Automation (RPA) technology in UiPath tool.
- I can enable bots to intelligently extract, interpret, and process data from documents. These documents can be a wide range of types from handwritten, scanned images to well-structured PDFs by Document understanding (Optical Character Recognition (OCR) it provides desired output.

### **Educational Qualifications**

- B.Tech. in Electronics and Communication Engineering 2017 to 2021 from Bapatla Engineering College which is affiliated by Acharya Nagarjuna University.
- S.P. jr. college - 2015 to 2017 -Board of Intermediate Education AP.
- ST.Arnolds High School March 2015.

## Personal Profile

**Father** : A.Veeraiah  
**D.O.B** : 15 April 1999  
**Nationality** : Indian  
**Marital Status** : Un-Married  
**Hobbies** : Cooking  
: Cricket

I hereby declare that all the information given above is true and correct to the best of my knowledge.

A. Issac.
