SUMMARY

RPA Developer with 2+ years of experience in automating processes using industry-leading tools like UiPath . Proven ability to streamline workflows, improve efficiency, and reduce manual errors. Skilled in process analysis, data integration, and scripting languages Python.

EXPERIENCE

RPA Developer

Marlabs Innovation PVT LTD

Dec 2021 – Mar 2024, Kochi

- Proficient in **UiPath Studio**, **UiPath Orchestrator**, and Studio activities for developing robust RPA solutions.
- Skilled in automating various tasks including **web scraping**, **email processing**, **document manipulation (PDF, Excel, PowerPoint, Word) using data scraping and table extraction techniques**.
- Possess a strong understanding and practical experience with **UiPath Document Understanding** for intelligent data extraction.
- Strong foundation in UiPath Studio activities, selectors, data manipulation, API integration, exception handling, data tables, regular expressions, computer vision, and workflow activities.
- Experienced in utilizing **UiPath Orchestrator queues, assets, and triggers** for robot deployment, monitoring, and management.
- Leveraged industry best practices (Robotic Enterprise Framework) to design and develop scalable and maintainable RPA bots.

PROJECTS

XIN Automation

Marlabs Inc., • Jun 2023 - Jan 2024

- Developing bots in UiPath Studio as a key team member for the XIN process.
- Leading the automation of logging into the XIFIN application and storing data, resulting in a 30% reduction in processing time.
- Extracting the patient details of the documents and fill into the application.
- Executing automation to search for patient name and DOB, or patient Acc ID, resulting in improved accuracy and efficiency.
- Collaborating with Business Analysts to comprehend requirements and deliver effective automation solutions.
- Coordinating with cross-functional teams to ensure timely task completion, fostering seamless project delivery.
- Assisting the testing team in identifying and rectifying bugs during bot development phase, ensuring a high-quality end product.

ITOCHU

Marlabs Inc., • Jan 2023 - May 2023

- Playing a role of developer in UiPath Studio.
- As an RPA developer, I'm part of the development process to develop the bot for the ITOCHU process.
- The process starts with Log in to the SAP application to download the invoice file, extract the data from the invoice file, store it in a specific folder, and send mail with the attachment of the invoice file to a specific customer.
- Closely working with Business Analyst to understand the requirement and provide automation solution.
- Collaborated with teams to ensure the efficient and timely completion of tasks.
- Working with testing team to identifying and fixing the bugs during the bot development.

RI Automation

Marlabs Inc., • Apr 2022 - Nov 2022

- Playing the role of developer (support).
- The process starts with getting the document from the mail attachment and validating the data from the file, then sending the validated data file to the specific pdf broker.
- Once the broker creates a pdf for that file, we must validate the data from the pdf file as well as the downloaded file. Once the data matches, we send the pdf file attachment to the customer.
- Collaboration with teams ensured that assignments completed efficiently and on time.
- I used regular expressions to validate data from a file.
- I extracted data from a PDF file using document understanding.

CHATBOT

Marlabs Inc., • Jan 2022 - Mar 2022

- Designed and developed a chatbot using Rasa and Python.
- Part of the team in charge of designing, creating, testing, and deploying the chatbot for Marlabs' main website in order to making the site more interactive and the interaction more useful and fun.
- This chatbot can give users with easy navigation and relevant solutions to site visitors' questions.
- Integrated navigation functionality to guide users through the website.
- Implemented a conversational personality for engaging interactions.
- Technologies: Rasa, Python, MongoDB, HTML, CSS, JS, and Docker.

SKILLS

RPA, Uipath Studio, Document Understanding, UiPath Orchestrator, RE Framework, UiPath TestSuite

Python, GitHub, Rasa Framework, Azure Framework, HTML

Communication, QuickLearner.
