## WORK EXPERIENCE

### RPA Developer

#### Phantom Smart Solutions

07/2022 - Present

Adyar Chennai

Power automate (Cloud & Desktop) Tool

- Worked on Email document extraction based on the email Data.
- I was working on a project based on Medical Billing that uses Power Automate Tools.
- I use Python API's along with power automate for better performance and better results.
- I am working on a data extraction project using Python's Pandas and NumPy packages, along with a machine learning model, possibly a variant of ChatGPT, LLM, for data training.
- Worked on extracting data from web into required formats / flat files which runs on scheduling concepts.
- Created a Bot that replies or forwards emails based on the email content.
- DPA tools provide monitoring, analytics, and reporting capabilities to track process performance, identify bottlenecks, and optimize workflows over time.

### Associate RPA Developer

#### Iopex Technology

02/2020 - 06/2022

Ambattur Chennai

UiPath Tool

- scrape structured data out of browser-based applications or documents and into a CSV file for an Excel spreadsheet using Bot.
- I am working on the backend page of a job portal, implementing job application functionality using the RPA UiPath tool. I handle the login validation and job category validation using this bot.
- Created a Bot that utilizes sharepoint to save files. using the tool in UiPath.
- I used MySQL Queries along with Databases data set collection work .
