PROFESSIONAL SUMMARY

- Around 4 + years of IT work experience in various technology like Microsoft **SQL SERVER, Power bi, ORACLE, MYSQL, phpMyAdmin** and involved in all development, implementation, testing and support process.
- **Power bi Dashboard and report creation using DAX function, measure creation, creating model relationship, using power query.**
- Responsible for transforming raw data into actionable insights by undergoing **Data cleaning, data modeling, data analysis and data visualization**.
- Expert in creating and using normalization techniques, sub-queries, joins, views, CTE's, stored procedures in SQL server.
- Responsible for collecting data and transforming raw data into actionable insights by undergoing various stages like **Data cleaning, data modeling, data analysis and data visualization.**
- Experience in creating and using Stored **Procedures, Triggers** and **Views .**
- Data analysis using **Microsoft-Excel** working on arithmetic, logical Formulas like **V Lookup, H lookup, Pivot, Count if** and so on.

TECHNICAL SKILLS

- Database Tools : SQL Server Management Studio,Microsoft Visual Studio, pl/sql oracle, Phpmyadmin, MySQL editor.

- Programing Languages : Opps concepts and Python libraries

- Business intelligent tools : Power bi ,MS-Excel

- Domain experience : Real Estate, Health care domain

PROFESSIONAL EXPERIENCE : CURRENT EMPLOYMENT

- **Tamil Nadu Medical Service Corporation Ltd** as **MY SQL developer (Feb 2022 – present)**
- Communicating to stakeholder, Dump collection periodically. Data synchronization activities. Data correction and data manipulation in client server through remote connections and also from main server in pl/sql , my sql and php my admin
- Data cleaning dashboard creation in power bi for business requirements. Using Dax ,power query, data modeling techniques.
- Providing insightful data to display in the websites.

- ➢ **PREVIOUS EMPLOYMENT**: **Scope E-Knowledge Center** as **web analyst**
- ➢ (Oct 2017 –Sep 2019)
- ➢ It is an application designed to provide the information about property, homes, apartments there features and properties to the users. It is achieved by gathering various information through different sources (mostly from client) in the form of files and importing data into databases, and performing several operations using database objects and delivering to the clients.

Responsibilities

- ➢ Creating Database Objects like **Stored Procedures, Functions, Views,** Tables in order to validate the data and to generate error reports.
- ➢ Creating queries to hold the data depending upon the incoming files and importing the data through SSIS Package. We do **manual testing** at the end of the process
- ➢ Testing similar set of data in different tables (we will test the formatted data around for 21 tables)
- ➢ Validating those tables using the various scenarios created as per client feedbacks
- ➢ Mentored Team members/New joiners for the same.

CERTIFICATION

- ➢ Certification in **GNIIT** for engineers - enterprise application development from NIIT

Professional Involvement

- ➢ Certification in workshop of Microsoft windows phone 8 app development
- ➢ Certification of implant training in HCL for hardware, networking, system administration and software platforms.

SCHOLASTIC PROFILE

- ➢ B.E (ECE) from Rrase College of Engineering in 2017 with an aggregate of 65%
- ➢ Higher secondary education from state board in 2013 with an aggregate of 63%
- ➢ Secondary education from state board in 2011 with an aggregate of 92%
