Professional Summary:

Overall 2+ years of IT experience as RPA Developer. Experienced in building RPA (Robotics Process Automation) solutions using UiPath. Implemented end to end automation solutions as per requirements which involves Analysis, designing, development, testing, deployment of automation. I am currently working as a **Junior RPA Developer** in **IGS Automation & AI India Private Limited**, Coimbatore.

Career Summary:

Automation:

• An enthusiastic RPA professional with IT experience including Automated business processes for Clients using RPA tools as UiPath

• Good with Business analysis, Business Process Development and Automation skills

• Implemented End to End Robotic Process Automation (RPA) for processes in Insurance sector using UiPath

• Expertise in RPA processes, including requirements gathering, solution designing, coding, testing, debugging, documentation and implementation using UiPath.

• Hands on experience on software delivery lifecycle on RPA projects like process mapping, business requirement, functional and technical specification, coding, design test script, test plan.

• Designed solutions utilizing RPA best practices and maintain technical responsibility for project delivery.

• Experienced in using UiPath Studio, Orchestrator, Screen, Data & Web scraping techniques.

• Built automated solution containing processes, work queues, environment using UiPath and developed the best practices.

• Worked on Automating Web portal, Excel, PDF, TXT and Email automations.

• Automated text in PDF's using screen scraping to calculate the invoices and store them into a data table using UiPath.

• Worked on Queue Configurations, Monitoring, Exception handling and environmental variables for processing of Business Process diagrams and Process flow charts using RPA tools.

• good knowledge of re-frame work and framework process.

Technical Skills:

Programming Language : Basic Python, MY SQL, VB.Net(Basics)

Automation Tools : UiPath (Primary skill) and Power automate (Secondary skill)

Bug Tracking : Redmine

Projects:

Accounting Automation	
Title	Qbo and Xero Site Automation
Duration	1year

Project Description	The object and scope of this project is login to Quick books website, download bank statements/deposit Receipt/check processing of corresponding Account and exporting transaction details to Database.
Roles and Responsibilities	- Developing robotic to transform the Business and IT operations of global clients. - Involved in end to end design and architecture of the process. - Development Automated (Robotic Process Automation) and designed Process flows entirely for process using UiPath. - Analyze and understand business processes. - Involved in creating and delegating Decision Rules. - Gathering detailed requirements from Client for business requirements. - Handling the team and assisting them in technical and providing the base design. - Preparing Impact Analysis by analyzing the existing system for automation development. - Preparing the design document about the automation process. - Translating business requirements of business users / bureau needs into software requirements specs and design, develop, test and implement program changes to achieve the business goals of the users. - Conducting unit testing and System testing - Facilitating Integration and User Acceptance Testing. - Involved in deployment of automation in user's environment. - Involved in designing UI screens and Implementing Validations

Invoice processing automation

Title	**Invoice processing automation**
Duration	1year
Project Description	Download monthly invoice from client site based on account number which was extracted from outlook mail for different vendors. Once invoice downloaded, we push those invoice to aws and uploading path in db for OCR processing. Once OCR completed, necessary inputs were uploaded inside db. Using those input, bot will post and generate batch id and update that batch id in db. Here also, all exceptions handled end to end and maintained logs separately [**UiPath Studio,Orchestrator,Attended robot, ODBCdatabase, SQL application,GSuite package, AWS, Microsoft package**]
Roles and Responsibilities	- Involved in end to end design and architecture of the process and in creating and delegating,Decision Rules - Gathering detailed requirements from business analyst - Handling the team and assisting them in technical and providing the base design. - Preparing Impact Analysis by analyzing the existing system for automation development. - Conducting unit testing and System testing

	• Facilitating Integration and User Acceptance Testing.
	• Resolved most of the outstanding and all the current issues reported by business users.
	• Cross tested all the issues/exceptions before deployment

Education:

Degree / Examination	Year of Passing	School / Institute	Board / University	Percentage / Grade
BE.Mechanical Engineering	2021	Chettinad College of Engineering & Technology, Karur.	Anna University, Chennai.	7.6%
H.S.C	2017	Karur Vetri Venayaka Matric Hr .Sec School,Karur.	State Board	66.4%
S.S.L.C	2015	Sri Meenakshi Matric Hr. Sec. School,Karur.	State Board	72.6%

Certifications:

- RPA Developer Foundation
- RPA Developer Advanced
- Python Basics

Personal Details:

Date of Birth   : 25.02.2000
Gender   : Male
Marital Status   : Single
Nationality   : Indian
Languages Known   : Tamil, English
Permanent Address   : No.7 Kudi Street,
      Renganathapuram North,
      Krishnarayapuram (TK),
      Karur (DT) – 639108.
