CAREER OBJECT

Seeking a challenging position as a Software Tester where I can utilize my skills in manual and automation testing to ensure the quality and reliability of software products while gaining valuable experience in the field.

SKILL

- ➢ Proficient in manual and automation software testing techniques
- ➢ Extensive experience with Selenium for automated testing and Core Java for test scripting
- ➢ Strong understanding of basic SQL (Oracle) for database testing
- ➢ Familiarity with TestRail and Jira for test case and defect management
- ➢ Experienced in API testing using tools such as Postman and Fireflink
- ➢ Excellent analytical and problem-solving skills
- ➢ Strong attention to detail and ability to work in a fast-paced environment.
- ➢ Good communication skills and ability to work collaboratively in a team.

EDUCATION

Master of Business Administration (Graduation: August,2018)
University of Madras [Chennai, Tamil Nadu]

Bachelor of Commerce (Graduation: May,2013)
Quaid-E-Millath Government College for Women [Chennai, Tamil Nadu]

EXPERIENCE

 Dedicated and detail-oriented Software Testing professional with comprehensive knowledge in manual and automated testing methodologies. Proficient in writing test cases using TestRail, tracking defects with Jira, and crafting effective testing scenarios. Experienced and participating in Crowd Beta Testing projects, ensuring thorough testing and quality assurance of software products. Strong understanding of software development life cycle (SDLC) and software testing life cycle (STLC). Excellent analytical and problem-solving skills.

PROJECT

Participated in testing a CRM domain application, understanding its features and modules. Conducted thorough testing of each module, writing comprehensive test cases to ensure software quality. Tracked defects using Jira and actively contributed to Agile methodology practices throughout the project lifecycle.

Role: Software Tester
Technologies Used: TestRail, Jira, Agile Methodology
