CAREER OBJECTIVE

Intend to build a career with leading corporate in a Windows and Unix/Linux environment. Committed & dedicated people, which will help me to explore myself fully and realize my potential. Willing to work as a key player in challenging & creative environment. Develop various workflows using UiPath and the Infra support.

CAREER SUMMARY

Dynamic and results oriented UiPath developer and Orchestrator with expertise in architecting and implementing end-to-end automation solutions. Proven ability to design, implement, and troubleshoot complex automation processes. Skilled in managing UiPath Orchestrator, configuring robots, and ensuring seamless operation of automated workflows. Strong background in custom activity development, process optimization, and system maintenance. Seeking opportunities to contribute expertise in automation and drive business transformation through innovative RPA solutions.

SKILL SET

- Scripting Languages: **PowerShell, Python.**
- Operating Systems: **Unix/Linux, Windows.**
- Database: **MSSQL, SQL.**
- RPA Tools: **UiPath Studio, UiPath Orchestrator, RE Framework, Power Automate.**
- Version Management Tools: **GIT, GIT Hub, Bitbucket.**
- Monitoring Tools: **AWS CloudWatch, Nagios, SCOM.**
- Ticketing Tool: **ServiceNow (SNOW).**
- Project Management: **JIRA (Agile CI/CD).**
- Amazon web services AWS: **EC2, S3, IAM, VPC, Route53, CloudWatch, ELB, Autoscaling.**
- **Management of VMware infrastructure.**

EXTERNAL CERTIFICATIONS

- **UiPath:** RPA Developer Foundation.
- **AWS:** Cloud Practitioner Foundational.
- **AWS:** Developer Associate.
- **TSO:** TSO "I Learn" Certification and BMC Certified Associate TSSA 20.x.

PROFESSIONAL EXPERIENCE: Associate Consultant at ATOS Global IT (From Feb 2020 - Present)

Roles & Responsibilities: **UiPath Studio, Orchestrator, UiPath Infrastructure**
- Designed and developed end-to-end automation solutions using UiPath Studio, including process automation, data extraction, and report generation, resulting in a 40% reduction in manual effort and improved accuracy in data processing using RE Framework.
- Managed and maintained the UiPath Orchestrator platform, including robot configuration, scheduling, and monitoring of automation workflows to ensure seamless operation and minimal downtime.
- Conducted database weekly maintenance, troubleshooting, and performance optimization to enhance the reliability and performance of automation processes.
- Conducted comprehensive testing and debugging of automation scripts to ensure robustness and reliability.
- Generate the Daily, Weekly and Monthly automation for the different tenants to check the execution logs, success and failure rates.
- Review and Approve Use case Develop by subordinate.
- Investigate customer problems referred by technical support.

Roles & Responsibilities: **BMC TSO and ARAGO Hiro**
- Designed and developed automated workflows using True Sight Orchestration to automate routine tasks, incident resolution, and provisioning processes to reduce manual effort and faster resolution times by Identify the scope of automation by analysis incident dump on each account.
- Integrated True Sight Orchestration with various IT systems, such as Service Now, monitoring tools, and configuration management databases (CMDB) to exchange data between different systems.
- Developed custom workflows and adapters to bridge the gap between different tools and technologies.
- Created comprehensive documentation of workflows, configurations, and integrations within True Sight Orchestration. Generated reports on workflow performance and efficiency improvements achieved through automation.
- Automation development cycle by Agile Framework and tracking by JIRA. Task like backlog grooming and sprint planning with scrum master.

EDUCATION
Bachelor of Information Technology, Prof. Ram Meghe Institute of Technology and Research, Badnera with CGPA of 8.0 (2016-2019).

HIGHLIGHTS
- Received Accolade Award for exceptional performance. (3 Times)
- Leading UiPath Infrastructure and Host Orchestrator.
- Provided trainings to L1/ L2 engineers.
- Documented several procedures and processes accurately.
